SUMMARY

Full Stack Developer experienced in building and maintaining enterprise web applications using React.js, TypeScript, Node.js, and Express.js. Skilled in end-to-end feature development, License Management module ownership, RESTful API development, backend development, and database management. Experienced in performance optimization, database query optimization, debugging, root cause analysis, and CI/CD using Jenkins. Solved 200+ Data Structures and Algorithms problems on LeetCode.

SKILLS

Frontend Development & Languages: JavaScript (ES6+), TypeScript, Java, React.js, Redux Toolkit, React Router, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Web Design, Figma-to-UI
Backend & APIs: Node.js, Express.js, RESTful APIs, GraphQL, JWT Authentication, Axios, Fetch API
Databases: MongoDB, Mongoose, MySQL, Firebase
Libraries, Tools & Testing: Apollo Client, TanStack Query, Zustand, React Context, Formik, Yup, i18next, Git, GitHub, Jenkins, CI/CD, Vite, Postman, Jira, VS Code, Vitest, Unit Testing
Core Concepts: DSA, API Integration, Performance Optimization, Debugging, Root Cause Analysis (RCA), Code Reviews, Agile/Scrum

WORK EXPERIENCE

Centralogic Private Limited

Software Engineer — September 2025 - Present

- Developed and maintained enterprise features for **Monotype Connect**, a font and license management platform, using **React.js, TypeScript, and reusable components** to build responsive, pixel-perfect interfaces from Figma designs.
- Improved application performance by **35%** through database query optimization, response caching, and reducing unnecessary React re-renders.
- Developed and integrated **RESTful APIs** using Node.js and Express.js, implementing data validation and error handling for reliable application functionality.
- Resolved **100+ bugs** through systematic debugging and root cause analysis (RCA), improving application stability and maintaining code quality through peer reviews and coding best practices.
- Owned the **License Management module**, delivering user stories end to end, from requirement analysis and acceptance criteria to development, testing, and QA validation; collaborated with QA teams to resolve UAT issues and supported releases through **Jenkins CI/CD pipelines** within Agile/Scrum sprints

5M India Technologies

Software Developer Intern — June 2025 – August 2025

- Developed responsive and user-friendly interfaces for MyRoadIndia.com using React.js, Bootstrap, HTML5, and CSS3, ensuring consistent layouts across devices.
- Integrated RESTful APIs into React.js components to display dynamic data and optimized frontend performance through component improvements, bug fixing, and cross-browser UI testing.

Project

Monotype Connect – Font Management & Typography Platform

- Developed 500+ React components and 50+ reusable components using React 19, TypeScript, and Antiqua Design System, translating Figma designs into responsive, pixel-perfect UIs.
- Owned end-to-end development of font management and license workflows, including requirement analysis, UI development, API integration, and testing.
- Optimized React rendering and component logic, resolved UAT bugs, and improved application stability in collaboration with QA teams.
- Supported Jenkins CI/CD workflows, managed code using GitHub, and collaborated with cross-functional teams in Agile/Scrum sprints.
